

Season Starter

2016/17 Season Starter: Estimated Pool Return update - 18 January 2017

Program Update

EPR's are today being either left unchanged or revised higher, in a range of \$1 to \$10 per tonne depending on port and grade. If you are still yet to deliver against your contracts and plan to utilise the Season Starter pool for harvest cash flow, please refer to the Guaranteed Minimum Returns published at the time of contracting. This is the number used to calculate your loan.

These EPR's remain very strong and ahead of current cash prices. With a little over 5 months remaining in the program, we are now very well placed to take advantage of opportunities and meet the pool objective which is to outperform the average of the best cash bid during the pricing window.

In the past month major developments impacting the Australian wheat market include the continued progress in harvesting the Australia wheat crop, the recent US Department of Agriculture Crop report and the fast approaching inauguration of Donald Trump as US president. While there have been snippets of news regarding improving prospects for consumption of Australian wheat, the stockpile of wheat globally plus relatively favourable northern hemisphere crop forecasts means little impact on values.

We will be providing your next update in February prior to the first distribution.

Pricing Mandate Update

AWB is committed to transparency and to demonstrate this, we provide a regularly updated pricing position. This exceeds the level of transparency recommended by the Australian Grain Industry Code of Practice, Operating Standard for Grain Pool Providers. The pricing mandate shows the parameters our trading team operate in when making pricing and hedging decisions.
