

AWB Spring Starter

2016/17 AWB Spring Starter: Estimated Pool Return update – 16 December 2016

Program Update

Today we are announcing, after assessing our current Estimated Returns for the Spring Starter Pool that we will be leaving EPR numbers unchanged.

In the month since last announcing EPRs despite some weather disruption, there has been plenty of harvest activity across the country. In the last fortnight both ABARES & the USDA announced their forecast for the Australian wheat crop at a new record level over 32million tonnes. Thankfully at a similar time, there have been some interesting developments globally which have slightly improved the demand side of the equation for Australian wheat. The combination of the two however has meant that prices haven't been greatly impacted.

We will be providing your next update towards the end of January.

I would also like to take this opportunity to wish you a happy and safe Christmas and all the best for 2017.

Pricing Mandate Update

AWB is committed to transparency and to demonstrate this, we provide a regularly updated pricing position. This exceeds the level of transparency recommended by the Australian Grain Industry Code of Practice, Operating Standard for Grain Pool Providers. The pricing mandate shows the parameters our trading team operate in when making pricing and hedging decisions.
