

AWB Spring Starter

2016/17 AWB Spring Starter: Estimated Pool Return update – 16 March 2017

Program Update

We have reassessed the Spring Starter program and will be leaving the estimated pool returns unchanged in March.

On the back of a very drawn out harvest which saw prices pressured at the end of January and into February, we have since seen some small price improvements in some parts of the country. However there still remains plenty of wheat in storage both domestically and globally which is keeping things fairly subdued.

With less than four months remaining in the program, we are very focused on protecting the program from downside shocks.

We will be providing your next update in April.

Pricing Mandate Update

AWB is committed to transparency and to demonstrate this, we provide a regularly updated pricing position. This exceeds the level of transparency recommended by the Australian Grain Industry Code of Practice, Operating Standard for Grain Pool Providers. The pricing mandate shows the parameters our trading team operate in when making pricing and hedging decisions.
