

Options this Harvest

This harvest, choose the right tools to suit your business and maximise your return. AWB combines world-class expertise with local insight to bring highly flexible, rewarding options to growers around Australia.

MIX YOUR MARKETING, MINIMISE YOUR RISK AND GROW YOUR BUSINESS

Daily Cash Pricing

Stay up to date. Subscribe to AWB's daily prices for wheat, canola, barley and feed grain.

Crop Insurance – innovations in crop insurance

In an unpredictable industry it pays to reduce your risk and protect your income. In an industry first, fire and hail insurance now comes with add-ons for Frost and Crop Emergence Failure insurance so you can stay covered through the year.

Harvest Pool – stay in the market longer

Just a small percentage of your crop in the AWB Harvest Pool can effectively spread your price risk and by participating in the market longer you can also capture potential upside. Growers who deliver to Harvest Pool and choose the Deferred Distribution option receive their first payment in July 2019.

Market Ultra – ultra clever risk management tool

Manage risk by locking in a minimum price for grain while staying in the market to participate in futures rallies.

Production Advance – fund the costs of growing your crop

Instead of turning to the bank, get an advance on your future harvest. Production Advance gives you access to \$100 per tonne on wheat and \$200 per tonne on canola from a forward contract with AWB. And its simple setup with no pre-approval costs means that you can expect funds quickly.

“We’re always looking to provide ways to enhance your business and make it more profitable.”
