Trial results

2017 NVT RESULTS

| Hybrid | Yield (t/ha) | Oil (%) | Dollars per hectare |
|---------------|--------------|---------|---------------------|
| V5003RR | 2.594 | 45.49 | \$1,487.74 |
| 45Y25 RR | 2.748 | 45.44 | \$1,444.90 |
| ATR Bonito TT | 2.386 | 45.13 | \$1323.96 |

Source: 2017 Victorian NVT trials, Five sites (all sites that included V5003RR, 45Y25 RR and ATR Bonito TT).

V5003RR - dollars per tonne (\$545) based on non-GM[^] price plus premium

45Y25 RR - dollars per tonne (\$500) based on GM canola discount price

ATR Bonito TT - dollars per tonne (\$530) based on non-GM[^] price

Grain prices indicative examples only.

Grower Experiences

“V5003RR is a great hybrid, we have grown in both wet and drier seasons, it’s been a consistent yielding hybrid – 3MT/ha Average in 2017.”

Trevor Peacock – Willaura, VIC

“We’ve grown VICTORY® Roundup® Ready since 2012 and it has yielded very well across our farm. In 2016 V5003RR yielded 3.1MT/ha in a very wet season and in 2017, despite the frost all around us, we still managed 2.8 MT/ha over a large area. These have been great results. We’ve also had oil contents of up to 49% in some years”. Danny George – Lake Goldsmith, VIC

Lake Goldsmith, VIC

Seed Treatment Options

Fungicide: All VICTORY® seed is treated with Jockey® fungicide as the standard fungicidal treatment for seedling blackleg protection.

Insecticide: Gaucho®, Cruiser® Opti and Cosmos® seed treatments are available in 2019 to suit local requirements.

Consider the expected paddock situation for disease and insect pest pressure in consultation with your agronomist when choosing seed treatments.

Blackleg: Cargill recommend following the Blackleg Management Guide when growing canola via the link: <https://grdc.com.au/GRDC-FS-BlacklegManagementGuide>

In High blackleg pressure situations consider the economics of a foliar fungicide application, always read the label and follow label directions.

Victory Program Features

- ✓ Four great hybrid options including Clearfield® and Roundup® Ready varieties
- ✓ Manage your price and production during the growing season
- ✓ Option to reduce the seed cost and defer your invoice until harvest
- ✓ Multiple delivery locations or a premium to store your crop on farm
